

# PROMOTIC

**PmFree  
SCADA system**

**FREE!**

**Free development environment (PmDevelopFree)  
and runtime licence (PmRuntimeFree)**

- Freeware for creating and running applications up to 30 variables  
(no time limit, no hardware key required)
- Containing all PROMOTIC communication drivers
- Includes all standard interfaces  
(ActiveX, DLL, OPC, DDE, SQL, ODBC, DAO, OLE, XML, TCP/IP, HTTP)
- Comprehends fully functional Web Server for 2 Web clients  
(for remote monitoring and control of the application via Internet Explorer)
- Incorporates complete electronic PROMOTIC system documentation
- Wide multilingual support (English, German, Russian, Polish, etc.)
  
- Very easily upgradable to higher commercial versions of the PROMOTIC system
- PmDevelopFree can also be used for creating applications up to 100 variables  
(for PmRuntimeLite - basic runtime licence with hardware key)

**PmFree is suitable for:**

**- Home use:**

- Centralized control panels for "Intelligent houses"
- Monitoring and control of heating, air conditioning and security systems
- Software tool providing the possibility to create self designed applications to everybody interested in contemporary monitoring and control technologies

**- Industrial use:**

- Freeware supporting software for automation hardware  
(embedded systems, industrial control panels, PLCs, heat meters, etc.)
- Design of simple industrial applications
- Hardware and communication testing platform
